

## Description

Purekor FSC Certified OSB is a hardwood based engineered wood panel that contains no added Urea Formaldehyde and uses 100% FSC Certified fiber.

## LEED Credits

MR 5.1 + 5.2 (location dependent)

MR 7.0

EQ 4.4

## Uses

Purekor FSC Certified OSB is available in a PRS or Struc-1 Grade, and can be used wherever traditional OSB is used, generally in structural applications including sheathing, roofing, and sub flooring.

## Features/Customer Benefits

### Multiple LEED Credits:

Contributes to multiple LEED Credits simultaneously

### FSC Certified:

Contains 100% FSC Certified Fiber

### Moisture Resistant:

Can be used in any location

### Superior physical properties:

Allows for great machinability and cutting

### Resists warping:

Provides superior dimensional stability

### Broad selection of thicknesses:

Available from 1/4" to 1 1/8"

### Broad selection of panel size:

Available in both 48"x96" and 48"x144"

## Service

McKillican can provide you with all your green forest product needs. Our product experts are available to answer any questions you may have regarding this product or any other, as well as LEED® requirements.

## Specifications

Most thicknesses are available in all panel sizes. Purekor FSC Certified OSB is made with no added urea formaldehyde and is produced in accordance with the requirements of the PS-2 (Performance Standard) grading requirements for OSB. The product is certified for use in all building codes in both the USA and Canada. Purekor® and Pyroblock® are registered trademarks of Panel Source.

## Sizes/Thicknesses

Thicknesses	1/4" to 1 1/8"
Finished Mat Size	48"x96" and 48"x144"
Thickness Tolerance	+/- .005" (Sanded Items Only)
Length/Width Tolerance	+/- 1/32" per lineal foot

## Grade Options:

Customers can choose from a number of grades including both square edge and T&G patterns, in both PRS and Struc 1 Certifications. Additionally, combination sub floor and underlayment panels can be ordered with either a "skip or fully sanded" surface.
